June 25, 2026

To the Board of Directors of the Las Gallinas Valley Sanitary District,

The management staff of the Las Gallinas Valley Sanitary District ("District or LGVSD") is pleased to present the Proposed Final LGVSD Budget for the upcoming 2026-2027 fiscal year. The Proposed budget includes the latest data on revenue projections, expense forecasts, debt service requirements, reserve funding, and capital outlay expenditures.

District Policy F-40-10, Budget Preparation), requires that the General Manager and Administrative Services Manager prepare an annual budget proposal. The proposed annual budget, as amended by the Board during its review, is historically adopted at the second regular meeting in June. As the regular meeting date landed on a District observed holiday, Juneteenth, the Board set the public hearing on the budget for the week later, on June 25, 2026.

SUMMARY

The District must provide enough revenue to cover the cost of providing sanitary sewer collection, treatment, and recycled water service including the costs of acquisition, construction, reconstruction, maintenance, repairs, replacement and operation of the sanitary sewer systems and the payment of principal and interest on bonds or other debt instruments issued for the construction or reconstruction of the sanitary sewer systems. Operating revenue includes sewer service charges collected, revenue from the production of recycled water, and revenue from permit and inspection fees related to development-related sewer system improvements of the collection system. Non-operating revenue, which supplements operating revenue, includes property taxes, interest, franchise fees, and other pass-thru reimbursement revenue. Capital contributions, grants, and the utilization of bond funds and reserves round out the revenue sources for the District. The District is anticipating \$57,545,529 in total funding for 2026-2027 with \$30,881,411 coming from revenue, \$3,910,518 from capital contributions and capacity related revenue, and \$22,573,600 from restricted and reserve funds including prior year loan proceeds.

Operations and Maintenance ("O&M") expenses will increase over the prior year budget by \$1,696,230, or 10.8%. O&M expenses means the reasonable and necessary expenses paid or incurred for maintaining and operating the collection, treatment, and recycled water systems ("Systems") of the District, determined in accordance with generally accepted accounting principles ("GAAP") that the Governmental Accounting Standards Board ("GASB") established for and is used by state and local governments in the United States. O&M expenses include all reasonable expenses of management and repair and all other expenses necessary to maintain and preserve the systems of the District in good repair and working order. These include all administrative costs of the District that are charged directly or apportioned to the operation of the systems, such as salaries and wages of employees, overhead, the cost of permits, licenses, and charges to operate the system and insurance premiums. Excluded from O&M expenses are depreciation, replacement, obsolescence charges, reserves, and amortization of intangibles. O&M expenses, including employee salaries and wages, comprise 30% of the budget. Historically O&M expenses are closer to 35-40% of the budget but because of the size of the capital budget for fiscal year 2026-2027, the percentage is lower.

Debt service requirements are up over last year to \$6,235,150 and include the 2017 Revenue Bonds, 2019 IBank loan, 2025 Lease Financing, and 2026 Revenue Bonds. Debt service comprises 11% of the budget.

New Reserve funding of \$4,090,443 is proposed and set aside to cover scheduled, routine, and unscheduled expenses that would otherwise be drawn from the General Fund. Reserve funds may also be used for large-scale projects and improvements. The District maintains four reserve funds and seven restricted funds. In addition to the 2026 Wastewater Revenue Bond Escrow and 2025 Equipment Lease Escrow funds established to hold bond and loan proceeds for identified capital projects, a new Restricted Development Agreement Fee Fund will be established in fiscal year 2026-2027. Restricted funds are monies set aside for a particular purpose and \$2,549,898 in additional funding is proposed with the budget and includes funding for the Recycled Water Capital Repair and Replacement fund required under agreement with Marin Municipal Water District ("MMWD"). Reserve funds are permanently restricted to that purpose and cannot be used for other expenses. Reserves Policy F-50 establishes and explains the purpose and reasons for each of the reserves established, along with target thresholds. Both the reserve funds and restricted funds are included in the reserve funding total, but they are different in that while the board can reallocate funds from reserves, while the restricted funds, such as Captains Cove and Marin Lagoon, serve a specific purpose and therefore their use is controlled by State law and agreements in place for providing service. Reserve and restricted funding comprise 5% of the budget.

The Capital Outlay effort for 2026-2027 remains the primary driver of expenditures for the District comprising 50% of the total budget. The total capital outlay for the Capital Improvement Program ("CIP") for Fiscal Year 2026-2027 is \$28,879,100. During the development of the CIP, review of strategic initiatives established by the Board, along with anticipated implementation of studies based on findings of the Integrated Wastewater Master Plan indicate that capital improvements will remain the primary expense driver for the District for at least the next 10-15 years. By adding to or improving District facilities the public materially benefits from the value and useful life of the assets of the District.

Loan proceeds of \$18,639,000 are the primary funding source for four large capital projects including the Multipurpose Lab Building currently under construction. Use of \$4,640,100 in unrestricted funds is the secondary source for the majority of capital projects in Fiscal Year 2026-2027.

Sincerely,

Curtis Paxton
General Manager

Dale McDonald
Administrative Services Manager

Las Gallinas Valley Sanitary District

Adopted Budget – 2026-2027

The Las Gallinas Valley Sanitary District is pleased to present its proposed Annual Budget for the upcoming fiscal year. This budget reflects the District's continued commitment to responsible financial stewardship, transparency, and the efficient delivery of services to the community. It outlines the anticipated revenues, planned expenditures, and debt service obligations, providing a comprehensive financial plan that supports the District's operational goals and long-term priorities. The Las Gallinas Valley Sanitary District adopts its budget annually.

The Government Accounting Standards Board ("GASB"), which is recognized as the official source of Generally Accepted Accounting Principles ("GAAP") for state and local governments, establishes modified accrual accounting standards. Modified accrual accounting is used and accepted by governmental agencies because they focus on current-year obligations. Las Gallinas Valley Sanitary District Policy F-40-20, Basis of Budgeting, required that all budgetary procedures conform to state regulations and generally accepted accounting principles. As such, the District uses a modified accrual basis of accounting for reporting on budgeted versus actual expenditures, with the following exceptions:

- Grant revenues are budgeted on a modified cash basis rather than an accrual basis.
- Fixed assets are depreciated for some financial reporting but are fully expensed in the year acquired for budgetary purposes.

Modified accrual accounting is an alternative bookkeeping method that combines accrual-basis accounting with cash-basis accounting. It recognizes revenues when they become available and measurable and, with a few exceptions, records expenditures when liabilities are incurred.

The General Manager and Administrative Services Manager are responsible for development of internal accounting policies and procedures necessary to implement financial policies and to ensure that internal controls, processes, and procedures follow the California State Controller's Office Internal Control Guidelines pursuant to CGC section 12422.5 and are adequate to protect the finances of the District.

REVENUE

Operating Revenue

The District is entering its fourth and final year of a four-year Sewer Service Charge ("SSC") rate plan. SSC revenue is the primary source of revenue the District receives. A rate increase of \$149 annually for Single Family Residential ("SFR") users is factored into the budget. Multi-Family SSC rate is discounted 10% to \$1,476 and Non-residential SSC varies based on water use of the customer and the estimated sewer strength of their wastewater. The rate increase will provide \$2,203,876 in additional revenue over last year and remains the primary driver of operating revenue growth.

Recycled water revenue is the estimated cost of providing water to Marin Municipal Water District ("MMWD") and North Marin Water District ("NMWD") based on the projected recoverable costs for the year. Projections for revenue are based on the percentage of actual recycled water provided to MMWD and NMWD. Water consumption data indicates a decline in non-residential usage (approximately 4.6%), which is expected to reduce realized SSC revenue slightly below the full rate increase. As a result, effective revenue growth is projected to be closer to 9%.

Las Gallinas Valley Sanitary District

Adopted Budget – 2026-2027

Inspections, permits, and application fees reflect projected revenue from fees related to the Private Sewer Lateral Inspection program, lateral repairs and replacement, and applications for engineering review. Revenue is based on historical home sales and permit data for properties within the District between 2019 and 2025. A slight increase is anticipated.

The Miscellaneous revenue account allows various incidental or one-off payments to be deposited into the District's operating account. Staff do not forecast a budget in this category, as they are difficult to project, but have included a small placeholder based on last year's budget to assist with future accounting if needed.

Non-Operating Revenue

Property tax revenues, which comprise a relatively small portion of total revenue, approximately 4.85%, are projected to grow at a slower pace of approximately 4.0%, reflecting continued uncertainty in the housing and lending markets. This represents a departure from the historical average growth rate of approximately 5%. Secured property taxes are calculated based on the value of real property, land, and personal property, such as structures, located upon real property. Secured property is taxed at a general rate of 1% of the assessed value. Property tax accounts for approximately 2% of the District's revenue. For 2026-2027, property tax revenue is expected to be \$1,383,600. Both the 1% annual Ad-Valorem tax increase for most property owners and the reassessment of property value upon sale of homes are factored in the revenue assumptions.

The District has historically identified secured property taxes as general fund revenue since the State puts no limitations on its use. It can, therefore, be considered a general fund that can be used for any legal purpose allowed by District Code and State law. The Low-Income Sewer Rate Assistance Program is funded from secured property tax revenue, and a total of \$25,000 has been allocated to the program in 2026-2027.

Prior Secured taxes, Supplemental Property Tax Assessments, and Home-Owner Property Tax Relief ("HOPTR") funds are projected to rise 6.6% over last year. These are collected by the County with and at the same time as the secured property taxes and SSC assessment. They are reported separately as required by the State Controller's Office and auditing standards.

Educational Revenue Augmentation Funds ("ERAF") are determined by State statute. Special districts are allocated a certain amount of property tax revenues; however, a portion is shifted from counties, cities, special districts, and redevelopment agencies to K-12 schools and community colleges. The District is subject to ERAF I and II tax shifts, which are specified by the State, using population and other factors. These factors are adjusted annually per the incremental growth rate in assessed property tax values. Staff have budgeted \$537,600 for 2026-2027, a 2.9% increase over using the foundational basis from the ERAF revenue received in 2025-2026.

The Solid Waste Franchise fee revenue is forecast based on the anticipated Marin Sanitary Service rate increase Proposed in January of each year. The revenue is based on the agreement with the solid waste franchisee, Marin Sanitary Service. Higher rates due to costs related to implementation of SB 1383, the State's organics recycling law, adopted January 2025, has increased both revenue and pass thru expenses related to the solids waste collection, recycling, and organic waste programs. An incremental increase in Franchise Fee revenue is forecast for January 2027 and is in alignment with the cost-of-service Franchise Agreement study completed in March 2024.

Interest income, which is invested in the California Cooperative Liquid Assets Security System ("California CLASS") and California Asset Management Program ("CAMP") investment pools, the Local Agency Investment

Las Gallinas Valley Sanitary District

Adopted Budget – 2026-2027

Fund with the State of California, and Bank of Marin has remained strong due to elevated rates and higher reserve balances in recent years; however, investment yields are beginning to decline and are expected to continue trending downward as reserves are drawn down to support capital expenditures. Reserve investment rates are currently at 3.8%. The District will utilize \$3.8 million in capital reserve funds held in CAMP for construction projects, which will reduce the amount of interest income received in 2026-2027.

The Private Sewer Lateral (“PSL”) Assistance Program has continued to collect reimbursement payments through the County from property owners participating in the program. The program is self-funded, with sufficient revenue coming from repayment by property owners to fund assistance to new property owners wishing to take advantage of the program. The balance in this program as of June 30, 2026 is anticipated to be \$411,000.

Anticipated revenue of \$95,400 will help offset the \$74,900 in expenses for related new assistance program issuance in 2026-2027. The District experienced a spike in property owners taking advantage of the program this year as homeowners took advantage of having the contractor performing the District’s Sewer Main Collection System Rehabilitation Program of 2024 replace their private upper sewer lateral, at the property owners cost, at the same time work was done on the public main sewer. It is anticipated that a similar program spike will occur towards the end of fiscal year 2026-2027 when property owners affected by the Sewer Main Collection System Rehabilitation Program of 2027 are notified of the program.

The Low-Income Sewer Assistance Program currently provides a 10% reduction in SSC to qualified homeowners. Operating revenue is reduced slightly, with \$25K set aside in the budget for 2026-2027. Management proposes continuing the program at its current rate.

The Reimbursements / Pass-thru / IRA Tax Credits / Rebates revenue account reports non-operational revenue such as the anticipated rebate from the California Energy Design Assistance (“CEDA”) program, administered by PG&E, as a financial incentive to offset the cost of decarbonization for the energy efficiency options to be included in the Multi-purpose Lab Building project. IRS Inflation Reduction Act (“IRA”) \$979,524 tax credit and PG&E SGIP rebate of \$1,073,969 are one-time revenue items being pursued for the Solar PV and Battery Energy Storage System Projects completed in 2026.

Capital Contributions / Capacity Related Revenue

Additional revenue in FY 2026–27 will be supported by one-time sources, including capacity-related fees from new development and the final IBank loan retention payment. While future development has been identified, revenue from these sources are not recurring and should be viewed as supplemental to the District’s core revenue base.

Annexation, Capital Facilities Charges (“CFC”), and Connections Fee activity for remodel permits and Accessory Dwelling Units (“ADUs”) has decreased from prior years. While the District is substantially built out and the pace of development is difficult to predict, staff are aware of a few large-scale development projects which are anticipated to be approved for connecting to the sewer system in 2026-2027. Staff are budgeting \$856,699 in receipts for capital facility charges for 2026-2027 primarily based on two larger known projects issued Will-Serve letters. Annexation and development fees are separate from the CFC connection fees and are determined by engineering review.

There are multiple land development projects currently in the works within the District boundaries. Some development will require upgrades to the District’s collection system and/or pump station facilities, requiring capital projects that would otherwise not be needed by the District. Development Agreements will allow

Las Gallinas Valley Sanitary District

Adopted Budget – 2026-2027

developers pay the full amount, or their proportionate share, in the cost for the improvements needed for their development projects without burdening ratepayers. These estimated fees are shown on the revenue page of the budget as well as being identified as a funding source on the Capital Improvement Program (“CIP”) for budgeted expenditures in fiscal year 2026-2027.

State and local governments have passed laws that allow additional expansion of ADUs to create more affordable housing and provide flexibility for families who wish to build a second unit on their property. ADUs are normally not subject to capacity or connection fees but can be billed a SSC depending on the size and number of units. The interest income for this category is for existing CFC funds held on deposit, which must be expended only for capital projects that increase capacity to either the collection system or treatment plant.

Marin Municipal Water District (“MMWD”) entered into an agreement in March 2017, to buy into the existing capacity of the Recycled Water Treatment Facility as well as participating in the debt service of the 2017 Revenue Bonds associated with the estimated cost for the expansion of the facility. Since project completion, the buy-in and debt service payments received from MMWD have historically been allocated to the undesignated Capital Reserves for future use by the District. This practice stopped in 2024-2025 when the District chose to deposit the MMWD payments into the operating account for use to pay their share of debt service which resulted in the District’s debt obligation being lower. In addition, according to the agreement, MMWD and LGVSD are required to meet and review the construction costs of the expansion project and adjust the buy-in amount based on the actual final costs of the project. The Marin Municipal Water District Inter-Governmental capital contribution revenue line item includes \$350,000 of buy-in and \$250,000 for anticipated revenue from the buy-in adjustment.

There is only one pending disbursement of \$567,760 from the IBank loan remaining, which will be disbursed once the Notice of Completion for the Secondary Treatment Plant Upgrade and Recycled Water (“STPURWE”) project is filed. The remaining funds will be returned to the general fund as STPURWE expenditures have already occurred.

No new grant funding has been identified for the 2026-2027 budget. Staff continues to investigate and pursue grant funding and can revise the budget if a significant grant is awarded that would impact the budget.

Financing / Loan Proceeds

Four major projects, primarily funded through debt service, are under construction in 2026–2027. Approximately \$18.6 Million in construction costs are financed through loan proceeds and other forms of debt obtained in 2025-2026. Proceeds are held un restricted escrow accounts for their designated purpose.

	FY 2025-26 Current Budget	FY 2025-26 12-Month Projected	FY 2025-26 % of PY Budget	FY 2026-27 Adopted Budget
Revenue				
Operating Revenue	22,772,999	23,046,343	101.20%	25,272,218
Non-Operating Revenue	2,883,960	3,234,254	112.15%	5,609,193
Capital Contributions / Capacity Related	1,747,963	1,096,705	62.74%	3,910,518
Loan Proceeds	25,600,000	36,438,119	142.34%	0
Utilization of Reserves and Restricted Funds	18,813,267	6,239,750	33.17%	22,753,600
	71,818,189	70,055,170	97.55%	57,545,529

Las Gallinas Valley Sanitary District

Adopted Budget – 2026-2027

Utilization of Reserves and Restricted Funds

In addition to the revenue the District receives, reserves and restricted funds are available for specific Board approved purposes. The District is projected to have approximately \$19,765,549 in reserves as of June 30, 2026. The budget includes utilizing \$3,925,000 of reserves in 2026-2027 towards capital projects.

- Capital Reserves are established for major capital projects that span two or more years, including upgrades and expansions. A designated reserve was established with a balance of \$9,000,000 for the acquisition, design, and construction of a Corporation Yard and costs above the loan amount for the Multipurpose Lab building. In addition, a second designated capital reserve fund for the Sewer Main Collection System Rehabilitation and Inflow & Infiltration Reduction Program, was established with a balance of \$1,500,000.
- Use of the undesignated Capital Reserves balance can be approved by the Board to be used for Capital Outlay projects as part of the budget process. Beginning with this fiscal year, the District is moving to a Single-Year Capital Outlay funding model as part of the annual budget process. As part of this migration, the District no longer will have a Prior Year Capital Carryover fund. Capital projects in progress will be funded from unrestricted general funds or undesignated Capital Reserves as shown in the Capital Improvement Program.
- Transfers from the Capacity / Connection Fee Facilities Fund, which has been growing as fees for new or additional connections to the system are paid by developers, can be used to pay for collection system and plant capacity improvements necessary to serve those connections.
- The Recycled Water Capital Repair and Replacement fund, established in May 2023, is expected to have an ending balance of \$43,968 as of June 30, 2026. The District is required to contribute 10% of their portion of recycled water operating and maintenance expenses to this fund annually.
- Two new Restricted Funds, the 2026 Wastewater Revenue Bond Escrow account and the 2025 Equipment Lease Escrow account, were established to receive and hold debt proceeds to support Board-approved capital projects and equipment acquisitions. The ending balance of the 2026 Wastewater Revenue Bond Escrow account as of June 30, 2026 is expected to be \$28,043,994. The ending balance of the 2025 Equipment Lease Escrow account as of June 30, 2026 is expected to be \$200,000.

Total Revenue Summary

Overall, operating revenue is projected to increase approximately 11% over the prior budget , primarily driven by the approved rate increase. However, this growth is partially offset by moderating economic conditions and reduced non-residential demand, reinforcing the importance of long-term financial planning beyond the current rate cycle. Total revenue, excluding the use of reserves and capital funding, for 2026-2027 is forecast to be \$30,881,411.

If there is a shortfall, it can be covered by identifying new revenue sources, reducing expenditures, reducing funding to the Operating & Rate Stabilization Reserve or other reserves, drawing down the District's unrestricted working cash capital balance, or a combination of the above.

Las Gallinas Valley Sanitary District

Adopted Budget – 2026-2027

EXPENDITURES

Expenditures in a sanitary district reflect the planned use of public funds to support core services such as wastewater collection, treatment, and disposal, along with the management and maintenance of the District facilities such as the reclamation area. As part of the annual budget, these expenditures typically cover personnel costs, facility operations, regulatory compliance, and capital improvements. Budget allocations are designed to ensure efficient service delivery, to provide for the protection of public health and the environment, and to support the long-term sustainability of district operations through measured capital improvement.

Expenditures of the District are reported under the following categories:

1. Operations and Maintenance Expenses (*including salary & benefits*)
2. Debt Service

Las Gallinas Valley Sanitary District

Adopted Budget – 2026-2027

- 3. Reserve Funding
- 4. Capital Outlay

The District’s largest expenditure category is Capital Outlay followed by Operations and Maintenance. The operations and maintenance expense, debt service, reserve and restricted funding, and capital outlay financials were analyzed, and key items of interest are noted in this report. The District’s reserve policy and reserve funding targets for the Operating & Rate Stabilization Reserve, Emergency Repair, Capital Reserves, and Vehicle and Equipment Reserve were reviewed and are included as part the budget process.

Operations & Maintenance Expenses

Operations and Maintenance (“O&M”) expenses, including salaries and benefits, represent a significant portion of the District’s operating budget and O&M expenses are projected to increase over the current year. The draft budget includes a 10.8% increase for 2026–2027 operating costs. This modest increase reflects a combination of ongoing maintenance requirements for critical infrastructure, anticipated increases in payroll costs, and slight increases in general & administrative costs balanced with cost saving measures where feasible.

Approximately 70% of O&M expenditures are considered essential and non-discretionary, limiting the District’s ability to achieve material reductions without affecting service levels.

No significant operational changes are proposed for 2026–2027, with the exception of a District Inspector, a new Full-Time Equivalent (“FTE”) position in the Engineering Department. This position will reduce reliance on outside consultants and improve efficiency in inspection and permitting functions. The position will support

Las Gallinas Valley Sanitary District

Adopted Budget – 2026-2027

normal sewer main construction project inspections, currently being performed under contract with outside service consultants, and private-sewer lateral inspections, currently performed by Collection Systems Operators.

Inflation projections using California Department of Finance SF Metropolitan Statistical Area CPI and Moody’s SF Metropolitan Area CPI, both forecasted at 3.3% in 2026-2027, were used in setting the budget for the majority of accounts (for example; general office supplies, utilities, and outside services). On top of the base CPI, it is prudent to budget an additional 5% for equipment and maintenance costs related to wastewater treatment plant and pump stations motors, gears, parts and supplies primarily dependent on overseas manufacturing.

Details of department financials were reviewed to develop the proposed budget. Minor adjustments will be made in developing the final budget.

Salary and Benefits:

Labor costs remain the largest component of O&M expenses, with salary and benefit costs making up 54% of the O&M expenses at the District. Negotiations with Operating Engineers Local 3 are ongoing, and a 3.3% Cost-of-Living Adjustment placeholder has been included in the proposed budget pending final agreement. Competitive labor market conditions continue to place upward pressure on both direct staffing costs and contracted services.

The Operator-in-Training (“OIT”) program has been successful, and management will continue the program into next fiscal year with Board support. The program term would remain at 6 months per OIT, rotating primarily between Operations, Collections, and Lab departments.

Las Gallinas Valley Sanitary District

Adopted Budget – 2026-2027

The Operations and Maintenance expense trend, with budget and actual expenses reported, shows that the District is managing its expenses well. Projected expenses for 2025-2026 are trending lower primarily because fewer contracted services and repair and maintenance expenses have been incurred to date.

Workers' Compensation insurance will increase 3.2% shadowing increased salary costs. California Sanitation Risk Management Authority's actuary developed funding requirements for the Workers' Compensation Program renewal for 2026-2027. The experience modification factor, used in the computation of the premium, increased from 0.91 to 0.94, with only a slight impact in rates.

Repairs and Maintenance:

Most repairs and maintenance activity is coordinated by the Maintenance Department, but actual expenses related to assets are allocated to the respective financial cost center (Collection System, Pump Station, Treatment Plant, or Recycled Water) for proper accounting. The Repair and Maintenance proposed budget for 2026-2027 is lower than last year's budget. The primary drivers of maintenance costs in 2026-2027 are:

- Equipment Maintenance & Repair expenses are projected to increase 3.1% over last year's budget.
- BioWheel Maintenance, Service, and Capital Repair is projected to cost less than what was budgeted for in 2025-2026 as the District has enough chains, sprocket units, and gears on-hand for repair of the drive trains.
- Reclamation pasture and pond maintenance expenses are expected to be about the same.
- Capital Repairs and Replacements is expected to increase, with equipment replacement at the lab being driven by the new Multipurpose Lab building, ongoing regular replacement of pumps at the treatment plant and pump stations, and other various wastewater treatment components replaced as needed.

Other Operating Expenses:

Other operating expenses include supplies and contracted services to support the operations at the treatment plant, pump stations, and administration of the District. The District must budget for peak-weather events, such as heavy storms, which are increasing in intensity from historical events. These events cannot be planned for but the District can prepare for them by addressing funding for additional treatment plant and collection system expenses expected during these events.

- Chemical Supplies make up the largest percentage of supplies required by the District. The amount budgeted for supplies is \$1,047,480, and of that \$843,300 is for chemicals. The District is a member of the Bay Area Chemical Consortium ("BACC") which assists the District in obtaining the most competitive unit pricing. Chemical costs are budgeted for based on historical wet-weather flow.
- Contract Personnel is funding set aside for potential vacancies at the District which may require short-term assistance from outside professionals while recruitment is underway or for emergency operator assistance if there is an employee staffing shortage. If unspent the funds remain in the general fund.
- Biosolids Management, Compliance, Sampling and Reporting was added to the 2024-2025 revised budget. Expenses for the program will continue into 2026-2027 at a projected cost of \$153,000.

Las Gallinas Valley Sanitary District

Adopted Budget – 2026-2027

- Outside contracted services include services related to personnel and HR services, guard service, labor relations, janitorial services, security patrols and alarm monitoring, portable restroom rentals, grant funding support, and other incidental outside operating expenses.
- Sludge injection and land disposal of biosolids is normally an operational expense of the wastewater treatment process. During the first year of the Biosolids Program Monitoring Research project, land application was performed as part of the biosolids feasibility study and sludge was injected into the District's dedicated disposal site. The associated costs related to land disposal of solids, required as part of the ongoing study, was charged to the Biosolids Program Monitoring Research project. As we enter the fourth year of the study, the proposed operating budget includes \$236,250 towards biosolids direct land disposal. The full cost of sludge injection and/or land disposal will remain an operating expense going forward.
- Consultants include costs for climate assessments, reporting to NPDES, MMWD water data review and rate setting assistance, recruitment, labor relations, and for organizational and Board development.
- Feasibility studies that are not capital improvement or capacity related are treated as an operational expense. The General Manager and District Engineer can approve feasibility studies up to their purchasing authority. Board approval for any study over \$75,000 is required.
- Financial Services includes funding for an independent financial advisor, actuarial valuations, arbitrage compliance services, and accounting support from Regional Government Services. In addition to the regular annual support, a 5-year Sewer Rate Study and separate 5-year Capacity Charge Study will be undertaken in the fall of 2026.

General and Administrative:

General and Administrative expenses round out the Operations and Maintenance expenses of the District. The expenses under this category are District wide and benefit all departments.

- Legal expenses related to ongoing settlement talks and potential litigation regarding the close out of the Secondary Treatment Plant Upgrade and Recycled Water Expansion ("STPURWE") project continue. The budget includes \$582,225 in legal fees and includes \$300,000 if the case were to go to trial.
- Computer Services and Software includes annual software renewals, outside computer network support, and other incidental computer software products. As software companies move away from providing owned software licenses and switch to a Software-as-a-Service ("SaaS") licensing and delivery model, in which software is licensed on a subscription basis and is centrally hosted, the District will see these expenses rise. CityWorks and ArcGIS follow the multi-year SaaS licensing models. Other software such as SCADA, Caselle, and Microsoft Office which have software license agreements for one year or less are treated as incidental software licenses. Computer equipment below the capital asset threshold is replaced as needed under the Office Supplies & Equipment cost center.
- The District's donation policy establishes a formal procedure for allocating funds to non-profit community groups requesting contributions from the District. As part of the policy, the Board funds the program from property tax revenue as part of the budget process. Donation funding for 2026-2027 is set at \$15,000.
- Rents and leases include the annual administration office lease at 101 Lucas Valley Road (\$125,324), lease of the postage machine, off-site records storage, railroad easements and copiers.

Las Gallinas Valley Sanitary District

Adopted Budget – 2026-2027

- Employee training and education includes the cost for the District to participate in the Liebert Cassidy Whitmore employment relations consortium and other offsite training. Management training and coaching is included in the budget for all managers and supervisors following the 2024 FutureSense climate assessment report.

Operations & Maintenance expense details by department were analyzed and rolled up into the proposed budget. Wastewater treatment remains the largest expense by function.

DEBT SERVICE

The District has five issuances of debt outstanding. They are as follows:

- State Revolving Fund Loan (“SRF”) was a construction loan which originated in 2010 and was completely drawn down in 2012. The original principal amount was \$4,314,750 with annual principal and interest payments through June 2032. The interest rate is 2.7%. The principal balance remaining is scheduled to be \$1,561,910 as of July 1, 2026.
- Bank of Marin Loan #1 which originated in 2011 with a principal amount of \$4,600,000. Monthly principal and interest payments are due through June 2031. The interest rate is 3.88%. The principal balance remaining is scheduled to be \$1,507,647 as of July 1, 2026.
- 2017 Revenue Bonds were issued in April 2017 with a principal amount of \$38,365,000. The true interest rate to maturity is 3.2984%. Annual principal and interest payments are due through April 2042. The principal balance remaining is scheduled to be \$28,655,000 as of July 1, 2026.

Las Gallinas Valley Sanitary District

Adopted Budget – 2026-2027

- The District entered into an agreement with California Infrastructure and Economic Development Bank (IBank) in May 2019 for a loan of \$12,000,000. The loan has a maturity date ranging from August 1, 2019 through August 1, 2043. The interest rate on the loan is 3.0% per annum. The principal balance remaining is scheduled to be \$9,478,020 as of July 1, 2026. An annual service fee, \$28,434 for 2026-2027, is treated as an Operating & Maintenance expense but recognized as debt service for budget purposes. The annual fee is not reported as a long-term obligation in audited financials.
- Solar PV and Battery Energy Storage System (BESS) 2025 Lease Financing agreement with Banc of America Public Capital Corp. The contract rate is 3.850% per annum. Annual principal and interest payments are due through September 2035. The principal balance remaining is scheduled to be \$5,854,426 as of July 1, 2026.
- 2026 Wastewater Revenue Bonds with a par amount of \$28,500,000 were issued on February 26, 2026 with net premium of \$30,338,119. The true interest rate to maturity is 3.767%. Annual principal and interest payments are due through April 2056. The first installment payment of \$747,140 is due October 1, 2026. The annual debt service for 2026-2027 is \$1,717,652.

The debt service does not reflect the reimbursement to be received from MMWD for buying into the existing recycled water treatment facility or their portion of the 2017 Revenue Bonds. The payments received from MMWD are deposited into the operating account for use to pay their share of debt service for the recycled water treatment facility improvements. Choosing to recognize debt service payments from MMWD as a reimbursement to the general operating account for debt service payments, rather than funding of the capital reserve, results in the District's 2017 Revenue Bonds debt obligation being lower.

The Debt Service Coverage Ratio ("DSCR") for the District projected for 2026-2027, based on the presented budget and debt service, is determined by dividing the Net Operating Income (\$13,541,837) by Total Debt Service (\$6,235,150). The calculated DSCR for 2026-2027 is therefore 2.17. The District is required to maintain a DSCR of 1.25 or higher due to bond covenants and we are above this minimum. The District includes both its operating income and non-operating income, primarily guaranteed property taxes, in determining its Net Operating Income which is used in the calculation of DSCR. For 2026-2027, the DSCR is buoyed by a one-time Solar PV and Battery Energy Storage System PG&E rebate and IRS Inflation Reduction Act (IRA) tax credit anticipated in 2026-2027. When specifically included in a utility's bond indenture, rate stabilization reserves can be used to help meet debt service coverage requirements during times of revenue shortfalls.

RESERVES

Reserve Policy F-50 requires periodic review of reserve targets as part of the budget process. Staff have evaluated current reserve levels and recommend maintaining and strengthening reserves to support financial stability during a period of increased capital investment. Maintaining adequate reserves remains critical to managing financial risk, supporting cash flow needs, and preserving long-term financial flexibility.

The total reserve target is currently \$25.3 million, with the Operating and Rate Stabilization Reserve comprising the largest share. Management recommends increasing the Operating and Rate Stabilization Reserve target from \$11.8 million to \$16.3 million to support seven months of operating cash flow and the full annual debt service requirements of the District. Management further recommends increasing the Capital Reserve target from \$11 million to \$13 million. These changes will increase the overall total reserve target to \$31.8 million.

Las Gallinas Valley Sanitary District

Adopted Budget – 2026-2027

Any additional increase in target goals will require revenue to be set aside for this purpose by reducing operating costs, pushing back capital projects, or identifying other sources of revenue. The District does not currently fully fund for depreciation of assets. The Capital Reserve policy does allow for accumulated depreciation to be reviewed and factored into setting the target goal, with the intent to have current ratepayers pay their share for the use of the District's assets.

Reserve funds are held in California Asset Management Program ("CAMP"). The interest earned in CAMP increases the balance of reserves and offsets the need to transfer funds from the District's operating account to meet the budgeted reserve targets.

The 2026–2027 budget proposes utilizing approximately \$3.9 million in reserves to support capital expenditures. While this approach reduces near-term reliance on additional rate increases or borrowing, it will decrease investment income and require future replenishment through operating revenues and other funding sources.

- Operating & Rate Stabilization Reserve has a target of a minimum balance equal to 7 months of average annual budgeted expenses. Based on reserve fund policy the reserve target for 2026-2027 should be \$16,300,000. The reserve will have a balance of \$5,529,795 at the beginning of the upcoming fiscal year. The budget includes adding \$1,695,034 to the budget for 2026-2027. The reserve was established to fund unexpected expense increases and can be used to help stabilize sewer service charge rate swings.
- Emergency repair reserve target is \$1,500,000 and can be used to fund emergency repairs. Any shortfall in the reserve is to be built up over 2-3 years. The budget is proposing \$74,074 be added to the reserve.
- Capital Reserves contains both designated and undesignated funds for capital projects. The target of \$13,000,000 includes \$9,000,000 designated for the acquisition of land and/or construction for the Corporation Yard project and for costs above the loan amount for the Multipurpose Lab building. The MMWD buy-in and debt service payments are no longer deposited into the reserve account. The budget for 2026-2027 authorizes \$3,795,000 for use towards projects on the 5-year Capital Improvement Plan.
- Vehicle and Equipment Reserve ("VERF") was established in Fiscal Year 2019-2020 to fund vehicle and equipment replacements. The reserve target was set at \$1,000,000. A total of \$267,842 will be added to replenish the VERF and \$130,000 will be used to purchase vehicles and equipment listed on the Capital Outlay budget in 2026-2027.
- Capacity Connection Fee reserve fund is restricted for the use of collection system and plant capacity improvements to serve the new connections that contributed to the fund through fees collected. The budget includes the addition of \$892,748 to the reserve and use of \$75,000 towards design of Upper Terra Linda Siphon Improvements.
- Captains Cove and Marin Lagoon are restricted reserves built up when there is an excess of special assessments over projected operations, maintenance and capital expenditures which are collected for these developments. Both funds will be drawn down to pay for operational expenses in 2026-2027. As the balance of the restricted funds is low, no capital projects are budgeted to use the restricted reserves in the upcoming fiscal year. A rate surcharge rate study will be undertaken in late 2026 to determine the surcharge amounts required to continue the ongoing operations and maintenance needs as well as capital improvement needs of the pump stations serving Captains Cove and Marin Lagoon communities.
- Recycled Water Capital Repair and Replacement restricted reserve fund was created in May 2023. The District is required to contribute 10% of their portion of annual recycled water O&M costs into this restricted fund for future capital expenditures to the Recycled Water Treatment Facility. A total of \$16,000 is estimated to be added to the restricted fund in 2026-2027.

Las Gallinas Valley Sanitary District

Adopted Budget – 2026-2027

CAPITAL OUTLAY

The District's Capital Improvement Program ("CIP") reflects a significant investment in infrastructure to maintain system reliability, meet regulatory requirements, and address long-term service needs.

Total capital outlay for 2026–2027 is approximately \$28.9 million, representing the largest component of the District's overall budget. Of this amount, approximately \$18.6 million will be debt financed, with the remainder funded through reserves and available cash.

The adopted 2026-2027 budget only includes funding approval for projects identified in the first year of the CIP and contains the list of projects to be funded with the adoption of this budget. The additional projects listed in the CIP are proposed for future years and they will require their own funding approval as part of their respective yearly budget.

The District budgets for Single-Year Capital Outlay funding as part of the annual budget process. During the budget development process, encumbered contract amounts will be identified, and funding will be included in the budget to cover the cost for projects in progress. Any unspent capital funding in the current year will be reallocated to the unrestricted general fund as of June 30, 2026. Funding sources and reauthorization of funds will be included in the 2026-2027 Capital Outlay budget that will be presented for final adoption and be effective July 1, 2026.

A substantial portion of the capital budget is dedicated to continuing multi-year projects, including the Multipurpose Laboratory Building and other previously approved infrastructure improvements. The adopted budget includes \$25,954,100 to fund ongoing and continuing projects with most of the funding coming from the 2026 Wastewater Revenue Bond Escrow Reserve being held by US Bank.

New Capital Projects Identified

New projects have been identified and added to the CIP. The list of projects proposed in the 2026-2027 budget are identified on the CIP Worksheets. Many of the new projects are for planning and assessment studies identified by the soon to be completed Integrated Wastewater Master Plan. Having these studies and assessments done could result in the District being in a better position for grant awards that require a project be "shovel ready." Some new projects identified are tied to development and will only move forward if a development agreement exists and funding is secured.

A total of \$2,925,000 is being allocated for new projects in the adopted 2026-2027 CIP Budget.

Authorization to proceed with financing projects is dependent on obtaining financing with acceptable terms. Projects may proceed in phases if funded from multiple sources if feasible.

ADOPTED BUDGET FY 2026-2027 - JUNE 25, 2026**

	2024-25 Actual	2025-26 Current Year Budget	2025-26 Projected End of Year	2026-27 Adopted Budget
Beginning Reserve Balance	\$ 15,471,703	\$ 17,375,753	\$ 17,375,753	\$ 19,765,549
Operating & Rate Stabilization Reserve				
Beginning Balance	\$ 4,247,894	\$ 4,833,105	\$ 4,833,105	\$ 5,529,795
Plus: Additions	585,211	696,690	696,690	1,695,034
Less: Use of Funds	-	-	-	-
Ending Balance	\$ 4,833,105	\$ 5,529,795	\$ 5,529,795	\$ 7,224,829
Purpose: Insure minimum of 7 months of O&M + Debt Service is available				Target: \$ 16,300,000
Emergency Repair				
Beginning Balance	\$ 1,166,667	\$ 1,277,778	\$ 1,277,778	\$ 1,351,852
Plus: Additions	111,111	74,074	74,074	74,074
Less: Use of Funds	-	-	-	-
Ending Balance	\$ 1,277,778	\$ 1,351,852	\$ 1,351,852	\$ 1,425,926
Purpose: Fund emergency repairs, replenish over 2 to 3 year period.				Target: \$ 1,500,000
Capital Reserves (STPURWE, OCC, and other CIP)				
Beginning Balance	\$ 9,065,924	\$ 10,747,395	\$ 10,747,395	\$ 12,687,427
Plus: Undesignated	-	-	-	2,053,493
Plus: Lab Multipurpose Buildings Designated Reserve	3,000,000	-	-	-
Plus: OCC / Admin / Corp Yard Buildings Designated Reserve	-	600,000	600,000	-
Plus: Sewer Main Rehab and I&I Reduction Reserve	-	1,500,000	1,500,000	-
Less: Authorized Use / Transfer of Funds ⁽¹⁾	(1,318,529)	(9,400,000)	(159,968)	(3,795,000)
Ending Balance	\$ 10,747,395	\$ 3,447,395	\$ 12,687,427	\$ 10,945,920
Purpose: To provide capital for major capital projects.				Target: \$ 13,000,000
Breakdown of Capital Reserves Balance				
	EOY 2024-25	CUR 2025-26	PRJ 2025-26	DRA 2026-27
Undesignated Ending Balance	\$ 1,747,395	\$ 1,347,395	\$ 2,347,427	\$ 2,605,920
Designated Ending Balance Buildings (Corp Yard, Multipurpose Lab)	\$ 9,000,000	\$ 600,000	\$ 8,840,000	\$ 6,840,000
Designated Ending Balance (Sewer Main Rehab and I&I Reduction)	\$ -	\$ 1,500,000	\$ 1,500,000	\$ 1,500,000
Vehicle and Equipment Reserve (VERF)				
Beginning Balance	\$ 991,218	\$ 517,475	\$ 517,475	\$ 196,475
Plus: Additions	100,000	100,000	100,000	267,842
Less: Authorized Use of Funds	(573,743)	(430,000)	(421,000)	(130,000)
Ending Balance	\$ 517,475	\$ 187,475	\$ 196,475	\$ 334,317
Purpose: To fund large vehicle and equipment replacements, replenish over 2 to 3 years.				Target: \$ 1,000,000
Ending Reserve Balance	\$ 17,375,753	\$ 10,516,517	\$ 19,765,549	\$ 19,930,991
				Target Total \$ 31,800,000

(1) In FY 24-25, \$1,318,529 was transferred from "Undesignated" to "Designated Lab Multipurpose Building" as part of the \$3M funding.

Total Budgeted New Reserve Funding: \$ 4,090,443
Total Use of Reserve Funding: \$ (3,925,000)

**LAS GALLINAS VALLEY SANITARY DISTRICT
RESTRICTED FUNDS
ADOPTED BUDGET FY 2026-2027 - JUNE 25, 2026**

	2024-25 Actual	2025-26 Current Year Budget	2025-26 Projected End of Year	2026-27 Adopted Budget
2026 Wastewater Revenue Bonds - US Bank Escrow (#xxxx)				
Beginning Balance	\$ -	\$ -	\$ -	\$ 28,043,994
Plus: Additions	-	19,500,000	30,338,119	-
Less: Use of Funds	-	(19,500,000)	(2,294,124)	(18,439,000)
Ending Balance	\$ -	\$ -	\$ 28,043,994	\$ 9,604,994

Purpose: Debt financing to pay for Multipurpose Lab Building, John Duckett PS, Terra Linda Crossing, Rafael Meadows and Civic Center PS

2025 Equipment Lease (Solar PV / BESS) - UMB BofA Escrow (#xxxx)				
Beginning Balance	\$ -	\$ -	\$ -	\$ 200,000
Plus: Additions	-	6,100,000	6,100,000	-
Less: Use of Funds (Solar PV / BESS Capital Projects)	-	(6,100,000)	(5,900,000)	(200,000)
Ending Balance	\$ -	\$ -	\$ 200,000	\$ -

Purpose: To finance Solar PV and Battery Energy Storage System Projects

Capacity / Capital Facilities / Connection Fee Fund (#5025)				
Beginning Balance	\$ 1,066,776	\$ 1,160,131	\$ 1,160,131	\$ 1,896,828
Plus: Additions	93,355	316,083	736,697	892,748
Less: Use of Funds (Upper Terra Linda Siphon)	-	(500,000)	-	(75,000)
Ending Balance	\$ 1,160,131	\$ 976,214	\$ 1,896,828	\$ 2,714,576

Purpose: To pay for collection system and plant capacity improvements to serve new connections.

Development Agreement Fee Fund (#xxxx)				
Beginning Balance	\$ -	\$ -	\$ -	\$ -
Plus: Additions	-	-	-	1,600,000
Less: Use of Funds to Development Capital Projects	-	-	-	(1,600,000)
Ending Balance	\$ -	\$ -	\$ -	\$ -

Purpose: To pay for collection system and pump station improvements required for new development, paid for by developer.

Captains Cove Fund (#5019)				
Beginning Balance	\$ 2,403	\$ 14,016	\$ 14,016	\$ 20,214
Plus: Additions	16,297	16,140	16,209	16,200
Less: Use of Funds	(4,684)	(10,600)	(10,011)	(14,600)
Ending Balance	\$ 14,016	\$ 19,556	\$ 20,214	\$ 21,814

Purpose: Special assessment fees in and class account 350 expenses out.

Marin Lagoon Fund (#5005)				
Beginning Balance	\$ 13,009	\$ 10,112	\$ 10,112	\$ 1,321
Plus: Additions	25,348	25,270	24,989	24,950
Less: Use of Funds ⁽¹⁾	(28,245)	(37,200)	(33,781)	(25,100)
Ending Balance	\$ 10,112	\$ (1,818)	\$ 1,321	\$ 1,171

Purpose: Special assessment fees in and class account 360 expenses out.

⁽¹⁾ Prior Year Capital Expenditures for Marin Lagoon Pump Station #1 to be recovered over multiple years as balance insufficient to cover entire cost of project.

Recycled Water Capital Repair and Replacement Fund (#5028) ⁽²⁾				
Beginning Balance	\$ 14,437	\$ 30,210	\$ 30,210	\$ 43,968
Plus: Additions	15,773	16,000	13,759	16,000
Less: Use of Funds	-	-	-	-
Ending Balance	\$ 30,210	\$ 46,210	\$ 43,968	\$ 59,968

Purpose: Capital repair or replacement costs at the Recycled Water Treatment Facility. Fund shall not exceed \$500K.

⁽²⁾ Established May 2023 with initial contribution by LGVSD made in 2023-24 covering multiple years since recycled water facilities came on-line. To be funded by LGVSD by multiplying the total annual recycled water Operating & Maintenance producing costs by 10%.

Total Restricted Fund Reserve Funding: \$ 2,549,898

**LAS GALLINAS VALLEY SANITARY DISTRICT
DEBT SERVICE
ADOPTED BUDGET FY 2026-2027 - JUNE 25, 2026**

Expenditure	2024-25 Total Actual	2025-26 Current Year Budget	2025-26 Projected End of Year	2026-27 Adopted Budget
2005 Certificates of Participation/ Refunded 2014	\$ 611,322	\$ 730,660	\$ 730,660	\$ -
2010 State Revolving Fund Loan	284,945	285,464	285,464	\$ 285,464
2011 Bank of Marin Loan	332,127	332,681	332,681	\$ 332,681
2017 Revenue Bonds	2,437,350	2,446,200	2,446,200	\$ 2,446,200
2019 IBank Loan	709,399	712,853	712,853	711,497
2025 Banc of America PCC Lease	-	-	370,828	\$ 741,655
2026 Revenue Bond	-	-	-	\$ 1,717,652
	\$ 4,375,144	\$ 4,507,858	\$ 4,878,685	\$ 6,235,150

Debt Service Breakdown FY 2026-27

Expenditure	Principal	Interest	Annual Fee
2010 State Revolving Fund Loan	243,293	42,172	-
2011 Bank of Marin Loan	278,345	54,337	-
2017 Revenue Bonds	1,300,000	1,146,200	-
2019 IBank Loan ⁽¹⁾	404,794	278,269	28,434
2025 Banc of America PCC Lease	521,229	220,426	-
2026 Revenue Bonds	345,000	1,372,652	-
	\$ 3,092,661	\$ 3,114,056	\$ 28,434

⁽¹⁾ Annual IBank fee treated as Operation & Maintenance Expense but recognized as debt service for budget purposes.
Only principal and interest is reported on audit as long-term obligations.

	2024-25 Final Actuals	2025-26 Current Year Budget	2025-26 Projected Actuals	2026-27 Adopted Budget
DEBT SERVICE COVERAGE RATIO (DSCR)				
Net Operating Income (NOI) = ⁽⁴⁾ - ⁽⁵⁾	\$ 10,153,596	\$ 10,013,615	\$ 12,003,002	\$ 13,541,837
Total Debt Service = ⁽⁶⁾	\$ 4,375,144	\$ 4,507,858	\$ 4,878,685	\$ 6,235,150
DSCR = NOI / Debt Service (Estimate *)	2.32	2.22	2.46	2.17

⁽⁴⁾ Operating and Non Operating Revenue

⁽⁵⁾ Operating Expense

⁽⁶⁾ Debt Service

Note: Excluding the one-time IRA tax credit and PG&E Rebate revenue in FY 2026-27 the DSCR would be **1.84**

* Actual DSCR will be determined at the end of the fiscal year based on actual revenue and expenditures.
Meets or exceeds Debt Service covenant requirements of 1.25 DSCR.
